

## 4 Unfolding your Trolley

The S5 CONNECT is fitted with the QUIKFOLD assembly mechanism. To unfold your trolley, press and hold the blue QUIKFOLD release button and lift the handle until the frame is fully extended (laying flat).

Lift the frame from the central hinge using the section marked in 'HOLD HERE' (do not hold anywhere else) until the lock clicks in place. Unfold the upper bag support.

For full-folding instructions and diagrams, please read the instruction manual.

## 2 Battery Charging

Plug the Lithium battery charger into your mains power supply. Attach the battery cable to the charger matching the black and blue connections. When the charging LED turns green, the battery is fully charged and ready to use.

● Charging ● Charged & Ready to be disconnected

Once charging is complete, please disconnect the charger from the mains power supply and unplug your battery.

For full charging instructions and battery care advice, please read the instruction manual.

## 3 Attaching the Wheels

The wheels are labelled with an L (Left) & R (Right) inside the central hub and need to be attached to the correct side (not applicable to DHC) when stood behind the trolley at the handle.

Push in the quick release button, slide onto the axle as far as possible, release the button and pull out slightly until you hear a small click.

## 1 Your Motocaddy S5 CONNECT

Thank you for purchasing a Motocaddy S5 CONNECT trolley.

The following information will help you get started as quickly as possible.

For in-depth usage instructions, plus important safety information, please read the full S5 CONNECT Instruction Manual prior to using your trolley for the first time. Further information is available at [www.motocaddy.com/support](http://www.motocaddy.com/support)

## S5connect

### QUICK START GUIDE

## Starting, Stopping and Speed Control

# 5

There is one main button that is used to turn the trolley on/off and control the speed (1 to 9).

Turn the button clockwise to increase the speed or anti-clockwise to decrease.

Press the button once to start or stop the trolley – it is not necessary to reduce the speed before stopping.

There are two indicating LEDs to display battery capacity (green, amber, red) and power.

## Installing the Motocaddy App

# 7

You will need to install the Motocaddy app to utilise the S5 CONNECT Smart Features. To install the 'Motocaddy GPS' app, search for "Motocaddy" on either the Apple App Store or on Google Play. Please note, the S5 CONNECT is not compatible with all mobile devices.

Once installed, we recommend that you complete the in-app registration to allow us to keep you informed of future updates and features.

## S5 CONNECT Smart Features

# 6

As the world's first 'Smart Cart', the S5 CONNECT can be linked to the Motocaddy app via a Bluetooth® connection on any compatible smartphone; allowing the trolley's Smart Display to be used in place of a conventional GPS.

The S5 CONNECT can also receive push notifications for text messages, email, missed calls and other compatible apps.

**Distance Measurement Device (DMD) features are legal to use when local USGA and R&A rule 14-3 is in effect. Always check local and competition rules regarding the use of DMD and Push Notifications prior to commencing play.**

## Pairing Mode

# 8

It is necessary to pair with a compatible smartphone to utilise GPS and Notification features. You will need to enable Bluetooth® on your mobile device.

1. Plug in the trolley battery to initialise the Smart Display
2. Open the 'Settings' page within the Motocaddy app
3. Select the PAIR button
4. Once the phone and trolley have connected, enter the code shown on the Smart Display into the app
5. When accepted, the Smart Display will show "BLUETOOTH PAIRED"

Once paired, your phone will reconnect when the trolley is on, the phone is within range (30m) and the Motocaddy app is open.

## GPS Mode

# 9

The S5 CONNECT must be paired and connected to a compatible smartphone with the Motocaddy app installed. Location services must be enabled. It is possible to use the S5 CONNECT with or without GPS.

1. Open the app and select "Play Golf" from the 'Home' screen
2. Select from the list of local courses or manually search
3. Select the required course
4. Once loaded, the S5 CONNECT Smart Display will update to show GPS information

The Motocaddy app will automatically advance sequentially to the next hole. It is possible to manually advance using either the app or the Smart Display left and right buttons.

## Push Notifications

# 10

The S5 CONNECT must be paired and connected to a compatible smartphone which has the Motocaddy app installed and open. Notifications will be automatically displayed based on the notification types selected from the 'Settings' menu within the Motocaddy app. It is possible to use the S5 CONNECT with or without notifications enabled.

There are also app specific notification settings within your phone. For a full list of compatible apps and individual app settings, please visit [www.motocaddy.com/support](http://www.motocaddy.com/support).

Notifications will stack on the Smart Display, with the most recent visible. To clear a notification, press the middle button. This will need to be repeated for each notification received.

## Clock & Round Timer

# 11

The date and time shown on the S5 CONNECT will be automatically set once you have paired with a phone for the first time and will record time based on the most recent pairing for up to 7 years without re-connection. The date and time are based on your phone's settings and cannot be set manually.

The round timer is controlled through the Motocaddy app and starts when a course is loaded. It can be paused and reset from the 'Map View' or 'Power Save' modes within the app.

When using the S5 CONNECT in GPS Mode, you can view the clock and round timer by pressing the middle button below the Smart Display.

## Closing the Motocaddy App

# 12

Once you have completed a round, you can close the Motocaddy app to stop location tracking and data usage.

If you are using an iPhone, double-press the home button to show open apps, find the Motocaddy app and swipe up on the preview to close.

Android users should navigate to recent applications, find the Motocaddy app and swipe left or right to close.
